Sprint-5 Assignment

Clarusway

Assignment Statement

- Write code block that take string and letter (`myFunction(myString, meyLetter)`), and return the number of specific letter in the string.

  For example => `myFunction("clarusway", "a")`
  Output => `2`

  ⚠ Please write your own code block to improve your algorithm skills for technical interview.

Submit

- Students will push the solutions to their own public GitHub repos.
- Share your repo link on LMS: 🔥 [LMS Submit](#) 🔥

  ☺ **Happy Coding!** 🖋
